

**AWEC is looking for a qualified Web developer/company to develop a modern website for AWEC considering the following approach:**

1. **Custom Dynamic Website Development:** Our primary focus is to create a dynamic website that meets AWEC's specific requirements. We'll work closely with your team to understand our organization's goals, target audience, and unique needs. The development process includes the following:
  - Custom design and development of website features and functionalities.
  - Implementation of user-friendly navigation and intuitive user interfaces.
  - Integration of interactive elements such as forms, multimedia, and databases.
2. **Responsive Design:** A responsive website is crucial for reaching our broader audience in today's digital landscape. The developer must ensure the website adapts seamlessly to various screen sizes and devices, including desktops, tablets, and mobile phones.
3. **Content Management System (CMS):** Implementing a robust and user-friendly Content Management System to empower AWEC's team to manage and update website content effortlessly:
  - Easy-to-use interface for content creation and editing.
  - Role-based access control to manage permissions.
  - Version control and content scheduling for timely updates.
4. **Cutting-Edge Technology:** The developer must use updated web technologies and trends. We will leverage the most advanced tools and frameworks to ensure that AWEC's website is feature-rich, high-performing, and secure.
5. **Avoidance of Third-Party Applications, Free Plugins, and Templates:** To guarantee the highest level of security and a unique online presence, we avoid using third-party applications, free plugins, or templates. The development process must be entirely custom, ensuring that our website stands out from the competition and remains protected from potential vulnerabilities associated with third-party software.
6. **Security and Performance:** Security and performance are our top priorities. We are implementing industry best practices to safeguard AWEC's website from threats and optimize its performance for fast loading times and smooth user experiences.
7. **Quality Assurance and Testing:** Before the website goes live, we will conduct thorough testing to identify and address any issues. Our quality assurance process includes functionality testing, compatibility testing, and security audits to ensure a flawless launch.
8. **Integration:** The developer must integrate AWEC's social media accounts into the website and ensure the real-time data feeds from the website to the social media account and vice versa.
9. **Duration:** The total development time shall not exceed one month.

10. **Instructions:** All interested web development companies must have a technical and financial proposal explaining the process of the website development.

Conclusion: Web Development must be dedicated to crafting a dynamic, responsive, and secure website for AWEC. We prioritize customization, cutting-edge technology, and a robust CMS to provide a tailored online solution that meets your organization's needs. By avoiding third-party applications, free plugins, and templates, we ensure your website remains unique, high-performing, and secure. Contact us today to begin the journey toward a standout online presence for AWEC.
